Continuous Assessment

As continuous assessment is one of the curriculum reforms propounded by the Education Bureau, the School will make use of it to enable our students to strive for better results in all subjects. Tests, projects, assignments and other modes of continuous assessment will make up the continuous assessment (CA) mark of a subject.

For cultural subjects, namely Computer Literacy, Design and Technology, Visual Arts, Physical Education and Music, there will be no formal examination. Marks for these cultural subjects are solely based on continuous assessment and will only appear in the students' Final Examination School Reports.

The tables overleaf summarise the weighting of academic and cultural subjects (9:1), the Mid-year Exam and the Final Exam (4:6) in calculating the Annual Total Mark for Overall Form Position in Grade 7 & 8 and Grade 9. For Grade 9, Integrated Science will be replaced by Physics, Chemistry and Biology.
