Measurement of Body Temperature

To protect students from possible infection from others during the exam period, the following will be implemented in the coming examination:

- a) Before coming back to school, parents have to take their son's temperature, jot down the temperature reading and sign on the record form below.
- b) Students who do not have the record form or have not taken their temperature may proceed to the General Office to have their temperature measured <u>prior to the start of an exam</u>. If they are late for an exam because they have to queue up at the General Office for temperature taking, no extra examination time will be given.
- c) Students have to place the record form on their tables for teachers' inspection during the examination period. If they are having a fever, or do not have the record form, or have not taken the temperature measurement of that day, they will be sent to a special room to take the exam and they have to wear a face mask throughout the exam period.
